

RGB Coding Problems

1) If you rise the green component of the color #E8262A by 60%, what is the new hexadecimal color code?

3) What is the sum of the blue and red components for the color #630406 in decimal?

5) A color has a red value of 225, a green value of 164, and a blue value of 79. What is its hexadecimal color code?

7) What is the sum of the blue and red components for the color #7901BF in decimal?

2) A color has a red value of 103, a green value of 59, and a blue value of 138. What is its hexadecimal color code?

4) If you decline the red component of the color #D49A22 by 80%, what is the new hexadecimal color code?

6) If you grow the green component of the color #BC2AAA by 90%, what is the new hexadecimal color code?

8) What is the sum of the blue and red components for the color #8758A8 in decimal?

RGB Coding Problems

9) In the color #74D921, what is the binary value for the red component?

11) A color has a red value of 214, a green value of 20, and a blue value of 3. What is its hexadecimal color code?

13) What is the sum of the red and green components for the color #07C95E in decimal?

15) A color has a red value of 41, a green value of 17, and a blue value of 25. What is its hexadecimal color code?

10) A color has a red value of 162, a green value of 98, and a blue value of 133. What is its hexadecimal color code?

12) If you fall the green component of the color #B87EDB by 30%, what is the new hexadecimal color code?

14) A color has a red value of 189, a green value of 171, and a blue value of 2. What is its hexadecimal color code?

16) In the color #18D79D, what is the binary value for the green component?

RGB Coding Problems

17) If you grow the blue component of the color #F139E6 by 30%, what is the new hexadecimal color code?

19) A color has a red value of 4, a green value of 189, and a blue value of 85. What is its hexadecimal color code?

21) If you expand the red component of the color #10E6D5 by 90%, what is the new hexadecimal color code?

23) A color has a red value of 158, a green value of 196, and a blue value of 149. What is its hexadecimal color code?

18) What is the sum of the green and red components for the color #0C4C06 in decimal?

20) If you fall the blue component of the color #2D1A3D by 30%, what is the new hexadecimal color code?

22) What is the sum of the blue and green components for the color #AFA4B6 in decimal?

24) A color has a red value of 16, a green value of 56, and a blue value of 136. What is its hexadecimal color code?

RGB Coding Problems

25) In the color #C5F514, what is the binary value for the green component?

26) A color has a red value of 154, a green value of 233, and a blue value of 15. What is its hexadecimal color code?

27) If you decrease the blue component of the color #FDE9E2 by 30%, what is the new hexadecimal color code?

28) In the color #A5C951, what is the binary value for the red component?

29) If you decrease the blue component of the color #852600 by 50%, what is the new hexadecimal color code?

30) If you drop the green component of the color #FF890A by 60%, what is the new hexadecimal color code?

31) In the color #1884F7, what is the binary value for the red component?

32) A color has a red value of 50, a green value of 17, and a blue value of 179. What is its hexadecimal color code?

RGB Coding Problems

33) In the color #7E44BF, what is the binary value for the green component?

35) In the color #D2FFE5, what is the binary value for the green component?

37) If you shrink the red component of the color #28F21D by 40%, what is the new hexadecimal color code?

39) In the color #704B60, what is the binary value for the green component?

34) If you decline the blue component of the color #19CEFB by 30%, what is the new hexadecimal color code?

36) If you expand the green component of the color #82F9C2 by 90%, what is the new hexadecimal color code?

38) A color has a red value of 220, a green value of 250, and a blue value of 81. What is its hexadecimal color code?

40) If you decline the red component of the color #5ADB22 by 20%, what is the new hexadecimal color code?

RGB Coding Problems

41) If you reduce the blue component of the color #D80BEF by 40%, what is the new hexadecimal color code?

43) What is the sum of the blue and green components for the color #0905B1 in decimal?

45) What is the sum of the green and blue components for the color #FFF0A4 in decimal?

47) A color has a red value of 89, a green value of 151, and a blue value of 188. What is its hexadecimal color code?

42) What is the sum of the green and red components for the color #B439C2 in decimal?

44) If you grow the green component of the color #835C88 by 90%, what is the new hexadecimal color code?

46) What is the sum of the red and green components for the color #4A5DCD in decimal?

48) A color has a red value of 174, a green value of 233, and a blue value of 33. What is its hexadecimal color code?

RGB Coding Problems

49) A color has a red value of 35, a green value of 240, and a blue value of 158. What is its hexadecimal color code?

50) A color has a red value of 53, a green value of 134, and a blue value of 47. What is its hexadecimal color code?
